

# LIBERAL DEMOCRATS

For a fair and green Hounslow

# 7 ECO-PLEDGES

Andrew Dakers has been recycling and composting for over 6 years

Every section of the Liberal Democrats' manifesto for the 2006 local elections details the 'Green Action' we will fight for in Hounslow in the next four years. In this mini-manifesto we outline our top seven green pledges.

## 1. Introduce doorstep plastics recycling

Liberal Democrats are committed to extending Hounslow's recycling service to include plastics on your doorstep.

For a copy of the full manifesto visit our website or call 020 8568 2209

## 2. Fight Heathrow expansion

Lib Dems are campaigning to retain 'runway alternation', for aircraft noise controls — and Andrew Dakers has pledged to lie down in front of the bulldozers if a 3rd runway is built.

## 3. Develop a complete cycle lane network

A costed plan must be established to complete and maintain Hounslow's cycle network. This is essential if we are to combat climate change.

## 4. Promote local food and allotments

Lib Dems will encourage supermarkets to trial provision of local, organic and seasonal food in Hounslow as well as supporting the development of Brentford Farmers Market and local allotments.

## 5. Bring biodiesel to the borough

We will work with service station owners to facilitate the early introduction of biodiesel pumps across the borough.

## 6. Promote wind and solar energy on homes

We are proposing the idea of 'Renewable Energy Zones' where community groups would apply for advance planning permission for micro-wind turbines and solar energy across a group of streets. This would save time and money.

Lib Dem Council candidates Andrew Dakers & Sunaina Kumar support a tax on plastic bags that pollute the river Thames

## 7. Encourage energy conservation and efficiency

Lib Dems are committed to working with the Energy Saving Trust to provide you with the latest information on reducing home energy use.
