

Reetendra Nath Banerji

Dear Friend and member,

Your PPC needs to provide a coherent, meaningful alternative that explains Liberal Democrat benefits to **all** sections of our society. I have been doing just that for the last twenty six years.

Choose me to challenge old, ineffectual policies that fail to combat organised criminals on our streets and City boardrooms. Choose me to fight against the collapse of Social Care and inequality.

Give me the platform to ask; why should our nurses, teachers and police officers not afford to live in the neighbourhoods they work in? And then I'll give the viable alternative. Help me show up the wasteful, talentless Tories for what they are. Crippling businesses. Delivering for no one.

With your help, I'll be presenting an alternative, promoting our values at every opportunity, highlighting better use of public funds, supporting the needs of modern schools and relevant local health provision.

Give me the platform to vigorously promote the fairness of our values and policies for business and workers alike. Growth is only real, if it is sustainable.

Let's take the fight to the other parties!

Reetendra Nath Banerji.

Clearly, to maintain the EU election swing in our favour will take hard work and not least, require a charismatic candidate to articulate our values with vigour.

I offer front line experience in exactly what is required for us to win here. I have the strategic awareness to discern the wood from the trees when dealing with attacks from the opposition and respond on issues that matter to each section of the electorate.

Strong Media Performer

I have been interviewed by BBC Sunday Politics London, ITV and Sky News promoting Liberal Democrat policies for many years and have authored my own weekly column in a regional newspaper.

I have often been asked by local and national radio for opinion and thought. On each occasion, I have explained tangible benefits for the electorate.

I highlighted Liberal inspired policies that work and raised our campaign in the media. My ambitious media strategy will have us lead the news items locally, regionally and nationally.

Climate Emergency

I have promoted the Green Investment and Growth Fund for inventive engineers to fund their inspired ideas to build a low carbon economy, creating new jobs in a new cutting edge industry. The technologies we build today, will be bought by emerging economies tomorrow.

Let me show off how our policies are different to those who talk about change and deliver nothing. We offer a positive vision for the future. Not project fear.

Forward Facing Policies

The media campaign will provoke discussion and excitement when I speak on proven methods of working with financial institutions and actual Liberal Democrat policies.

My experience includes working with

pressure groups on controversial issues such as the £6bn Lower Thames motorway crossing, HS2 and the Stonehenge tunnel. Let's put this experience to good use with organisations like HACAN.

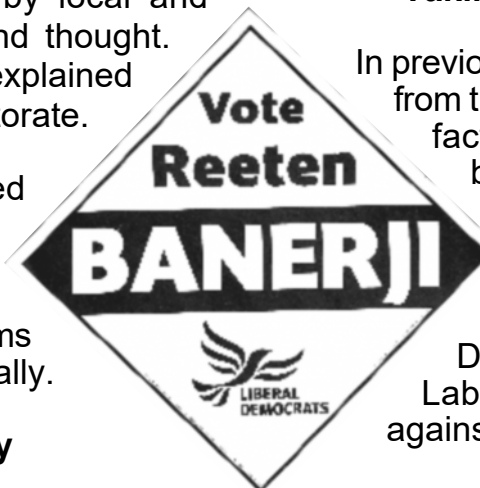

Experience and Knowledge

My campaigning experience and policy knowledge enables me to defend and promote Liberal Democrat achievements in both local and national government.

As your candidate, I will showcase our ability of working positively and pragmatically with people with different views. I will ask the electorate to consider how Tories are unable to work with each other and how the Labour leadership disagrees with it's own party.

Taking votes from Labour

In previous campaigns, I gained support from traditional Labour voters with the fact that Liberal Democrats balance financial sense with compassion and fairness. We believe that hard fought for workers rights and equal pay and are best protected by EU Directives. I shall speak against Labour's caution and inaction against Brexit.

Britain is crying out for leadership on this issue. Let me supply that coherent voice we are in desperate need of. We offer a positive vision for the country and for Europe. Let's together, proudly promote diversity as a positive for culture and economic benefit.

As an Election Agent and GE candidate, for twenty six years, I've been devising local strategy, swinging Labour votes to the Liberal Democrats. As your candidate I will do this again in Brentford and Isleworth. Together, we can ingrain Liberal values into the fabric of our country's society and economy today.
